

- Media that have at least title, image (HTTP link to an image), author, ISBN code, short\_description, publish\_date, publisher and type (book, CD, DVD). Additionally, you can also track the status (“available” or “reserved”; required for Bonus Points)
- Authors that have at least name, surname and media should be tracked
- Publisher of media (name, address, and size of the publisher (“big”, “medium”, “small”))

step 3:

media
id_media: int
title: string
img: string
author: string
short_description : sting
ISBN: int
publish_date : date
type: enum book, cd, dvd
status: enum (available, reserved)
publisher: string

step 4:

	We will here present a version with 3 tables. We only implement one in sql, as discussed on slack	
--	--	--

step 1

step 2
